

# It's Cool, it's shades of blue...

## ...and the new FreeStyle limited edition DeVilbiss GTi PRO is unbeatable on water!

It's about time that professional refinishers around the world were offered a special edition GTi Pro and this time, the theme is extreme watersports and in particular surfing. You don't have to be a surfer of course, you may not listen to the Beach Boys or drive a Veedub camper van, but it is essential you look cool, so with every FreeStyle gun you get a superb pair of slimline aviator style shades!

### It's radical!

The FreeStyle limited edition GTi Pro spray gun combines the FreeStyle logo and unique graphics depicting a surfer in the "pipe" together with a durable and visually stunning two tone blue anodised finish... a first for the professional refinisher's favourite spray gun.

### Awesome performance!

The Pro FreeStyle is built to the same exacting standards as every DeVilbiss gun featuring the superb ergonomically designed gun body and revolutionary "no-kick" air valve. Top quality performance with base or clears is guaranteed and you can specify your GTi Pro FreeStyle with either the H1 HVLP or T1 / T2 TransTech air caps plus #12 or #13 fluid nozzles. This is the gun to be seen with this summer.

The GTi Pro FreeStyle is supplied as a complete refinishers kit complete with the spray gun, gravity cup and paint filter, four coloured ID snap rings, the Torx/screwdriver, combination spanner and cleaning brush.
