

Part Number: AD05500 Case Quantity: 6

Ceramic Engine Protector

MPM Ceramic Engine Protector is a superior multi-functional engine oil additive, formulated to perform under the most extreme conditions. The high degree of metal surface bonding results in a consistent solid and unequalled lubrication coating on the most critical and wear sensitive parts of the engine like tappets, bearings and piston rings. MPM Ceramic Engine Protector delivers not only a high performance lubrication film which prevents metal-to-metal contact but also ensures rapid heat transfer from internal component surfaces. For all petrol, diesel and LPG engines with or without turbocharger. MPM Ceramic Engine is mixable with all commercially available engine oils. It is not harmful to catalytic converters, and will not clog the filters.

- Significantly reduces friction and wear.
- Restores engine power.
- Prolongs engine lifetime.
- Reduces engine noise level.
- Improves cold start performance.
- Reduces hazardous exhaust gas emissions.
- Reduces engine oil temperature.
- Improves load carrying capacity of the lubrication film.
- Aids fuel and oil consumption.
- Provides long term protection of your engine.

Not suitable for motor cycles with a wet clutch.

The 250 ml contents are suitable to treat 4 to 6 litres of motor oil.

Part No: AD04200 Case Quantity: 6

Professional EGR & Intake Cleaner

MPM Professional EGR and Intake Cleaner is a uniquely effective high-grade product for cleaning and removing contaminants and deposits found in the air intake, EGR system and turbo. It is suitable for all petrol, diesel and LPG engines, with or without a turbocharger and should be used in engines sensitive to intake fouling and DPf saturation. Oils, resins, lacquer and carbon deposits are rapidly dissolved with minimum effort.

- Effectively cleans the turbo, EGR system, air intake, throttle valve and combustion chamber of power-robbing deposits and lacquer-like components.
- Increases lifetime of sensitive engine components such as catalytic converters and diesel particulate filters (DPF).
- Reduces fuel consumption and emission of hazardous exhaust gases.
- Improves engine performance, idling and starting.

The contents of one aerosol is sufficient for one treatment via the air intake or cleaning dismantled parts as per your requirements.

Part Number: AD08500 Case Quantity: 6

Diesel Detox Professional

MPM Diesel Detox Professional is a very effective multi-purpose clean-up treatment. This unique formulation not only addresses the most common deposit issues found in modern diesel engines but it also boosts the cetane number, protects against corrosion and lubricates the fuel pump. MPM Diesel Detox Professional cleans the complete fuel system including clogged injectors, valves and combustion chamber and is suitable for all diesel engines including common rail, with or without turbo charger. In combination with a special supplement (organo-metallic) this treatment also targets and cleans the turbo variable vanes and the diesel particulate filter, which are often caused by a previously malfunctioning fuel system and incomplete combustion.

- Boosts cetane number, protects against corrosion and lubricates the fuel pump.
- Regains performance loss caused by a dirty and inefficient fuel system, coked turbo and saturated diesel particulate filter.
- Extends lifetime of the expensive turbo and diesel particulate filter
- Reduces fuel consumption and emission of hazardous exhaust gases.

The contents of 500 ml are suitable to treat 40 to 60 litres of diesel fuel.

Driveshafts from €55

CV Joints from €25

Another quality brand at great value from **TOP PART**

Ref: GSP TecDoc

- EBT sells only brand new drive shafts. Core handling does not apply.
- All CV joint kits contain the joint, the boot, the grease sachet and the fixation parts.
- The already quite large range of hubs is being enlarged constantly. Being OE manufacturer for rubber to metal components we are now offering these parts also to the independent aftermarket.
- EBT is permanently optimizing and increasing the range to be offered. Customers are being informed regularly about new product releases. Each quarter we provide all data for new products to TecDoc.
